

Kostya Diachkov

Multidisciplinary Designer / UX/UI Designer

I make websites and design user experience to help people, NGO's and brands reach their goals. With more than 7 years of experience in Digital Design I started from web-banners, landing pages & corporate websites and stopped at web-based app with design system. As a media artist, I'm working with neural networks and other audio-visual content creation algorithms (creative coding). As an UX/UI designer I worked with startups & non-profit educational, science, cultural organizations, such as St. Petersburg Art Residency, Perm State University, PSU Endowment Fund, Cat shelter "Matroskin". Also I completed a number of commercial projects.
